CarePhones & Sensors

The Carephone 62 offers multiple innovations that will help you manage your social alarm easily, efficiently and economically. It offers the possibility to communicate through IP or GSM telephony, in addition to analogue landline telephony.

The Bosch Carephone 12 is a care system with a wide range of applications. It is simple to install and easy to operate, combining maximum functionality with excellent duplex speech quality in a compact housing.

Waterproof and lightweight, the S37 Transmitter enables the user to summon help at any time by pressing a button, which will activate a radio signal to a Carephone. It may be worn comfortably as a wristwatch, as a medallion with an adjustable cord or clipped on clothing.

The Fall Detector is a device equipped with a help call button and an automatic release of an alarm in case of a heavy fall followed by immobility. It was specially developed to be carried on the wrist permanently with maximum comfort for the user in his everyday life. The Fall Detector can be conveniently carried as a watch and its internal battery can be replaced.

The Wireless Flood Detector reacts upon detecting an entry of water or other conducting fluids. An alarm will be sent when a contact is made with a fluid height of 1 mm.

The WLSN Door-Window Contact provides magnetic reed contacts for monitoring doors and windows. The internal reed contacts (one on each side) are activated by an external magnet assembly which can be placed on either side. It also has built-in wall and cover tampers and a supervised point input for monitoring external devices.

In the event of smoke caused by a fire, the Wireless Smoke Detector issues a local, high-volume intermittent tone. At the same time, it signals the danger by sending a wireless transmission to the Carephone which then triggers an alarm via the telephone network.

The Wireless Gas Detector reacts upon detecting methane gas or propane / butane in the atmosphere. An alarm will be sent when the level reaches 20 % under the explosion limit.
